1968 Precision Metal Editorial

DIE CASTINGS

12th Annual Die Casting Directory ..... Jan. p. 97
Acurad—an interim report ..... Jan. p. 75
Aluminum breakthrough announced as custom die casters meet ..... Nov. p. 89
Aluminum—3 Die Lubes for die casting approved, DCRF ..... Dec. p. 35
Aluminum—from ingot to die casting ..... Jan. p. 84
Aluminum—from ingot to die casting. Part II ..... Feb. p. 44
Aluminum gives high-strength to thin-wall die castings ..... June p. 61
Auto grille is "Zinc Die Casting of the Year" ..... Oct. p. 86
Automation, not mechanization ..... Nov. p. 57
Better lawn sprinkler ..... Apr. p. 66
Cast hot work steel dies ..... July p. 57
Cast-in vs. post-installed inserts for die castings ..... Feb. p. 47
Computerized cost estimating ..... Nov. p. 71
Copper alloy die castings ..... Mar. p. 58
Copper alloy die castings: poised for a big leap forward ..... July p. 54
Die Casting Show & Congress ..... Oct. p. 48
Die casting was the only practical way ..... June p. 66
Die cast nameplates—functional, decorative, low cost ..... Jan. p. 86
Die cast part fits better, looks better, costs less ..... Oct. p. 63
Die cast part meets tough specs ..... Mar. p. 66
Electrostatic spray coating of metal components ..... Oct. p. 91
Extended warranties require better component finish ..... Dec. p. 38
Faster, safer handling of die casting melt ..... Dec. p. 43
Fire resistant fluids—can you afford not to convert? ..... Sept. p. 92
First fifty years of AZI ..... Apr. p. 62
For small parts: zinc or plastic? ..... May p. 60
Gating for production die casting ..... Aug. p. 31
Good alloy guarantees good performance ..... Apr. p. 60
Heat and load no problem for zinc die castings ..... Sept. p. 78
Hot chamber die casting of aluminum ..... Dec. p. 31
How a computer helps inspect die castings ..... Nov. p. 68
How do finishing costs compare? ..... May p. 63
How instrumentation improves die casting quality ..... Nov. p. 60
Improving wear and thermal fatigue properties of die steels ..... Aug. p. 38
Industrial designer looks at die castings and plastics ..... May p. 51
In-motion radiography ..... Aug. p. 40
Is commercial ferrous die casting near? ..... Sept. p. 84
Less shock—lower maintenance for trim presses ..... Oct. p. 64
Longer die life with a new die castable bronze ..... Oct. p. 68
Lower costs for data printout wheels ..... Jan. p. 85
Mechanical pouring for cold chamber die casting machines ..... Mar. p. 62
Molybdenum in hotworking tools. Part I ..... July p. 61
Molybdenum in hotworking tools. Part II ..... Aug. p. 44
Moving molten metal: The future outlook ..... Nov. p. 72
Multiple drill and tap—before trimming ..... Nov. p. 83
New vertical die casting machine ..... July p. 64
One way to reduce die casting scrap ..... Oct. p. 62
Over 3000 different parts processed in one vibratory finishing department ..... July p. 67
Precision vibratory finishing—Part I ..... Aug. p. 53
Precision vibratory finishing—Part II ..... Sept. p. 105
Process instrumentation; mechanical handling featured at die casting show ..... Dec. p. 54
Production costs compared for die casting and molding ..... May p. 58
Punchcard automatically sets up die casting machine ..... Nov. p. 67
Quick look back at PRECISION METAL and the die casting industry ..... Nov. p. 84
Robots—helpers toward die casting automation ..... Nov. p. 64
Small vibrator—large production volume ..... Oct. p. 97
Some mechanical and physical properties of die cast and plastic materials ..... May p. 71
Some new approaches to melting and holding—Part I ..... June p. 62
Some new approaches to melting and holding. Part II ..... July p. 47
Suggestions for using water soluble die casting lubes ..... Jan. p. 88
Thermal analysis: what can it do for die design ..... Jan. p. 79
Tiny die castings: one or multi cavity die? ..... Sept. p. 82
Tooling costs compared for die casting and injection molded plastics ..... May p. 55
Zinc die castings create modern design ..... Apr. p. 53
Zinc die casting—still preferred in autos ..... July p. 44
Zinc die casting in the 1969 cars ..... Dec. p. 36
Zinc die casting to plastic to zinc die casting ..... Nov. p. 140

"Mounting Overhead"
The following items are always Uniform and Fully Guaranteed.
One Source, saves money!
LaFrance products for die casting
All materials are quality-controlled through a re-check in our laboratory prior to shipment. We blend new formulas to meet special requirements for plants having unusual problems.
Die Parting Agents
Plunger Lubricants
Cutting Lubricants
Hi-Temp Protective Coatings
Pot Ladle and Mold Wash
High Temp Marking Crayons
Aerosol Graphite & Molybdenum Disulfide

Our laboratory will be glad to answer your questions or send detailed literature or samples on request.

EXTRUSIONS

9th Annual Extrusion Directory ..... Oct. p. 109
Aluminum extrusions go into combat zone ..... Nov. p. 139
Automatic heart machine now has impact extruded column ..... Mar. p. 57
Cast hot work steel dies ..... July p. 57
Change multi-piece parts to one piece impacts ..... Nov. p. 97
Design data developed for 3 new superalloys ..... Jan. p. 67
Double forging and/or extrusion production ..... Nov. p. 126
Electrostatic spray coating of metal components ..... Oct. p. 91
Extruded racket frame puts zip in game ..... Aug. p. 35
Extrusions are the cornerstones of new furniture system ..... Aug. p. 51
Ferrous extrusions cut engine part cost ..... July p. 43
Fuel filter body is one piece ..... Sept. p. 102
In-motion radiography ..... Aug. p. 40
Lifesaving guardrail is extruded ..... Oct. p. 61
Memory drums made from aluminum impacts ..... Aug. p. 49
Molybdenum in hotworking tools—Part III ..... Sept. p. 89
Redesign to extrusion eliminates difficult welding operations ..... Oct. p. 83
Titanium extrusions ..... Feb. p. 27
When to design as an impact ..... Sept. p. 55
World's largest brass extrusion press makes forging preforms ..... Jan. p. 66
Zinc extrusions—a new bright trim? ..... Jan. p. 57

FINISHING

Automatic circular transfer for secondary machining ..... Jan. p. 94
Cast-in vs. post-installed inserts for die castings ..... Feb. p. 47
Reduce forged part costs with punching and piercing ..... Mar. p. 93
Deflash, deburr and surface improvement—simultaneously ..... Jan. p. 91
Electrostatic spray coating of metal components ..... Oct. p. 91
Extended warranties require better component finish ..... Dec. p. 38
Forged parts cleaned in one-fourth the time ..... Dec. p. 47
How do finishing costs compare? ..... May p. 63
How to bend aluminum tubing ..... June p. 81
Lowering tube deburring costs ..... Aug. p. 56
Machine bending now feasible for alloy steel forgings ..... Nov. p. 109
Making vibratory installations versatile ..... Nov. p. 112
Mass finishing forgings ..... Sept. p. 97
Over 3000 different parts processed in one vibratory finishing department ..... July p. 67
Precision vibratory finishing—Part I ..... Aug. p. 53
Precision vibratory finishing—Part II
Reduce forged part costs with punching and piercing Mar. p. 93
Small vibrator—large production volume ..... Oct. p. 97
Water pollution—and the metal finishing industry ..... Apr. p. 87
Water pollution and the metal finishing industry Part II ..... May p. 81
Water pollution and the metal finishing industry Part III ..... June p. 87

FORGING

3rd Annual Directory of the Forging Industry ..... Mar. p. 99
Aluminum forging houses nuclear reactor ..... Mar. p. 89
Apollo-Saturn V forgings ..... Mar. p. 90
Automated forging system ..... Sept. p. 75

1968 Precision Metal Editorial

Forged parts cleaned in one-fourth the time ..... Dec. p. 47
How do finishing costs compare? ..... May p. 63
How to bend aluminum tubing ..... June p. 81
Lowering tube deburring costs ..... Aug. p. 56
Machine bending now feasible for alloy steel forgings ..... Nov. p. 109
Making vibratory installations versatile ..... Nov. p. 112
Mass finishing forgings ..... Sept. p. 97
Over 3000 different parts processed in one vibratory finishing department ..... July p. 67
Precision vibratory finishing—Part I ..... Aug. p. 53
Precision vibratory finishing—Part II
Reduce forged part costs with punching and piercing Mar. p. 93
Small vibrator—large production volume ..... Oct. p. 97
Water pollution—and the metal finishing industry ..... Apr. p. 87
Water pollution and the metal finishing industry Part II ..... May p. 81
Water pollution and the metal finishing industry Part III ..... June p. 87

FORGING

3rd Annual Directory of the Forging Industry ..... Mar. p. 99
Aluminum forging houses nuclear reactor ..... Mar. p. 89
Apollo-Saturn V forgings ..... Mar. p. 90
Automated forging system ..... Sept. p. 75

Index

Brass forgings form new pressure valve ..... Apr. p. 70
Capabilities of cold forming ..... Mar. p. 75
Cast hot work steel dies ..... July p. 57
Design data developed for 3 new superalloys ..... Jan. p. 67
Design data for forged aluminum truck suspension part ..... Aug. p. 37
Double forging and/or extrusion production ..... Nov. p. 126
Drop forging: from wagons to space vehicles ..... Sept. p. 55
Electrostatic spray coating of metal components ..... Oct. p. 91
Extended warranties require better component finish. Dec. p. 38
Fewer rejects for gun barrels ..... Mar. p. 86
Forge-men exchange views: diversification suggested ..... Nov. p. 102
Forged parts cleaned in one-fourth the time ..... Dec. p. 47
Forged titanium rotor hub "grows" another arm ..... Dec. p. 34
Forgings in the C-5 Galaxy ..... June p. 65
Greater forging production by mechanization ..... Oct. p. 93
Hot press brass forging—a refresher course ..... Mar. p. 72
How to increase your hammer production ..... Mar. p. 82
Impacts go to war ..... Mar. p. 89
In-motion radiography ..... Aug. p. 40
International Forging Conference ..... July p. 46
Is upset forging the answer to your design problems? Part II ..... Jan. p. 61
Machine bending now feasible for alloy steel forgings ..... Nov. p. 109
Mass finishing forgings ..... Sept. p. 97
Miniature cold headed parts ..... May p. 74
More strength, less weight for hot rod wheels ..... Mar. p. 84
Reduce forged part costs with punching and piercing. Mar. p. 93
Swaging for low and high production ..... June p. 57
Where titanium forging differs ..... Feb. p. 41
World's largest brass extrusion press makes forging preforms ..... Jan. p. 66
Zinc forgings; New design material ..... Nov. p. 100

INVESTMENT CASTING

13th Annual Investment Casting Directory ..... June p. 97
Design data developed for 3 new superalloys ..... Jan. p. 67
Avoid these misconceptions about investment casting ..... June p. 75
'Copter part cast in beryllium copper ..... June p. 76
Cost of steel yokes reduced 25% by specialized casting process ..... Dec. p. 42
Design guide for small investment castings ..... June p. 79
Design parameters for investment cast titanium ..... Feb. p. 36
Firing losses cut on preformed ceramic cores ..... Apr. p. 61
High strength aluminum casting alloy ..... Oct. p. 58
Improving on investment shell mold materials ..... Nov. p. 94
Investment cast for high temperature strength ..... Aug. p. 78
Investment casting selected for 737 jet thrust reverser ..... Jan. p. 65
Investment castings help the Intrepid win ..... Apr. p. 61
New sprue for investment casting ..... Aug. p. 46
Recent developments in investment castings ..... July p. 50
Troublesome TV tuner part is now investment cast .... Dec. p. 40
Which pattern material for investment casting? ..... June p. 77
Why designers specify investment castings ..... Mar. p. 55

PERMANENT MOLD

Cast hot work steel dies ..... July p. 57
High Strength aluminum casting alloy ..... Oct. p. 58
Molybdenum in hotworking tools. Part II ..... Aug. p. 44

POWDER METALLURGY

17th Annual Directory of the Powder Metallurgy Industry ..... Apr. p. 95
Aluminum powder metallurgy now feasible ..... June p. 67
Bronze steel by P/M ..... Sept. p. 110
Facts and fallacies about Powder Metallurgy ..... April p. 73
From scrap . . to iron powder ..... Oct. p. 64
High performance economical P/M parts ..... Apr. p. 82
Impossible P/M parts ..... Mar. p. 65
Iron P/M parts for magnetic applications. Part I ..... Apr. p. 74
Iron P/M parts for magnetic applications. Part II .... May p. 78
New—all hydraulic—compacting press ..... July p. 49
New tantalum powder ups electrical capacitance ..... Jan. p. 65
P/M assembly designed with two different powders .. Nov. p. 105
P/M makes a good design economical ..... Sept. p. 110
P/M parts demanding service in limit switch ..... Apr. p. 85
P/M parts: 200,000 psi tensile ..... Dec. p. 45
P/M selected for rifle bolt ..... Aug. p. 77
Short runs for P/M parts: are they economical? ..... Jan. p. 58
Sintered chain sprockets reduce car costs ..... Nov. p. 137
Sintered filter for auto engine environment ..... Aug. p. 50
Spur gear differential has 14 P/M parts ..... Mar. p. 64
State-of-the-art for titanium powder metallurgy ..... Feb. p. 38
Titanium alloy powders ..... Feb. p. 31
Troubleshooting in P/M parts production ..... Apr. p. 79

GENERAL ARTICLES

Foamed plastic patterns for complex castings ..... May p. 77
Improved mold material for titanium castings ..... Feb. p. 46
Partial value analysis isn't enough ..... May p. 54

Get...

WROUGHT PRODUCTS by JANNEY

PDQ is a concentrated effort on the part of all Janney personnel to provide:

Price • lower unit costs

Delivery • as scheduled, as specified

Quality • finest quality products

Add the Janney PDQ concept to these benefits obtained by forging, extrusion or high energy rate forming:

- **refined, equiaxed grain structure**
- **vacuum integrity**
- **water-tight qualities**
- **100% conductivity guaranteed per IACS standards**
- **maximum thermal conductivity**

You'll get products that offer the reliability necessary for critical applications. You'll get them faster —and at lower prices.

The whole story is in our 24-page wrought products catalog. Write for your free copy PDQ.
